

PERMACORE

WATER ACTIVATED PERMANENT POTHOLE REPAIR

Water caused it. Let water fix it.

TRAFFIC USA
MANAGEMENT

Making Our Roads Safer!

A CERTIFIED INSTALLER FOR TRAFFIC CALMING USA

Rainy weather, below-freezing temperatures and heavy traffic volume are no longer barriers to fast and effective street repair. **PermaCore** is a ready-mix, quick setting, water activated street repair compound designed to permanently repair even the most stubborn potholes.

PermaCore is specially formulated to harden in the presence of water and can be applied to concrete or asphalt surface streets, highways, bridge decks, parking lots, sidewalks and anywhere else fast and permanent pavement repair is needed. Installation is quick and easy and **PermaCore** can be driven on immediately after installation.

Product Advantages

- ✦ Repairs even the most stubborn potholes permanently
- ✦ Can be installed in rain and in temperatures below freezing
- ✦ Consists entirely of environmentally friendly components
- ✦ Can be installed by a single worker in a matter of minutes
- ✦ Can be opened to traffic immediately
